

# Check before your purchase!

## 1 Distance between mounting holes

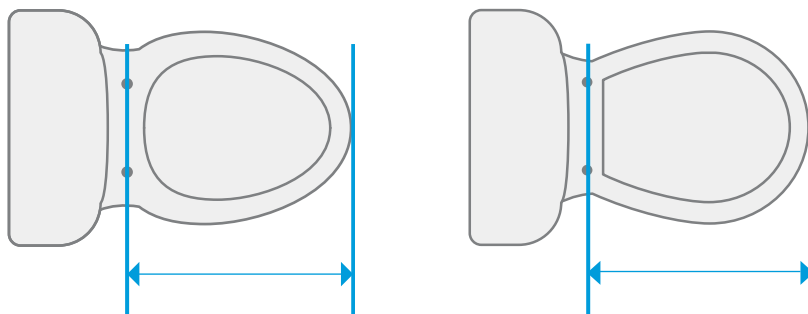

Measure the distance between mounting holes on your toilet. It must be 5.1~7.9 inches (130mm~203mm).

## 2 Distance from the center of mounting hole to the front of toilet tank

Measure the distance from the center of mounting hole to the front of toilet tank. It must be more than 1.8 inches (45mm).

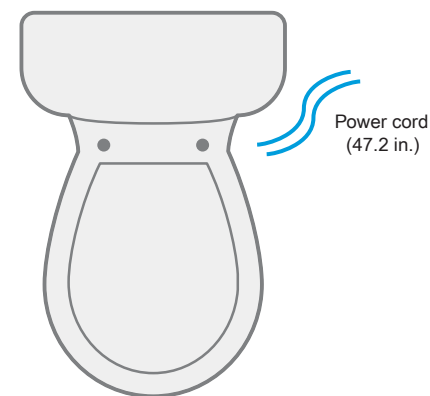

## 3 Distance from the center of mounting hole to the front of the toilet bowl

Measure the distance from mounting hole to the front of the toilet bowl for choosing Elongated or Round type.

- If it is 17.54 – 19.23 inches, order a Bidetmega E type.
- If it is 16.26 – 18 inches, order a Bidetmega R type.

## 4 Power outlet and toilet bowl type

Please check if there is a grounded power outlet near your toilet.

(The length of the power cord is 47.2 inches.)

Please check if the toilet bowl is round and flat.
