

# LUXE Bidet<sup>®</sup>

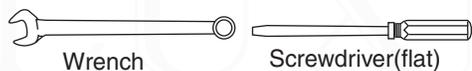

## Assembly Instruction

### NAMES AND FUNCTIONS OF PARTS

\*Please note: illustrations may vary depending on the model

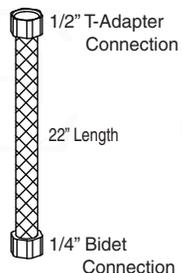

#### Installation Tools You May Need

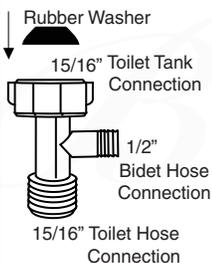

### PARTS

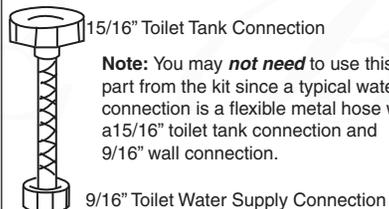

#### Flexible Metal Braided Hose

#### Plastic T-Adapter

#### Flexible Water Supply Hose

**Note:** You may *not need* to use this part since a typical water connection is a flexible metal hose with a 15/16" toilet tank connection and 9/16" wall connection.

# LUXE Bidet<sup>®</sup>

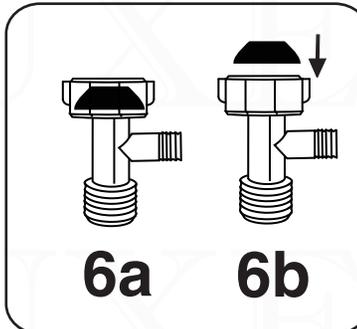

## NEO110<sup>™</sup>, NEO120<sup>™</sup>, & NEO180<sup>™</sup>

**4** Bidet should now be aligned with the coupling holes.

**5** Screw the seat back on to the bidet and the toilet.

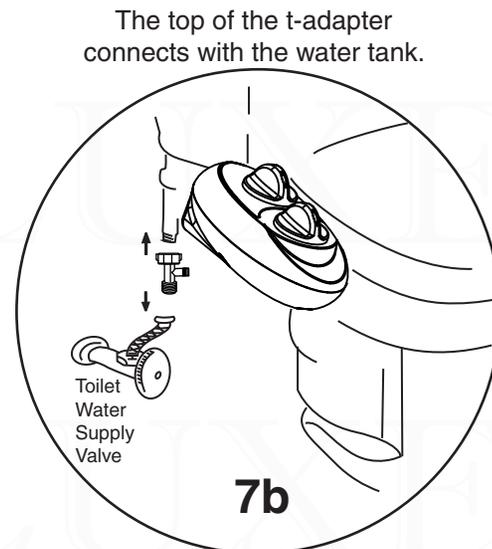

**6a:** Make sure that there is a black rubber washer inserted at the top of the t-adapter.  
**6b:** If it is not already there, insert it as shown in figure 6b.

### 7 Connecting Water Supply

**7a:** Make sure you have shut off the toilet water supply and flushed the toilet to empty the tank. Disconnect the water connection from the tank.  
**7b:** Connect the plastic T-adapter to the water supply as shown in figure 7b.

**7a**

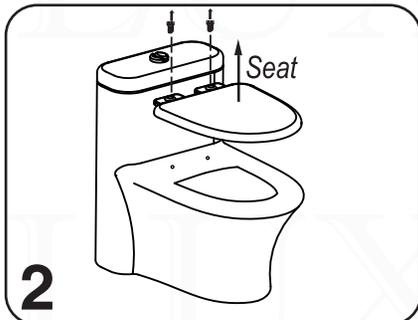

**7b**

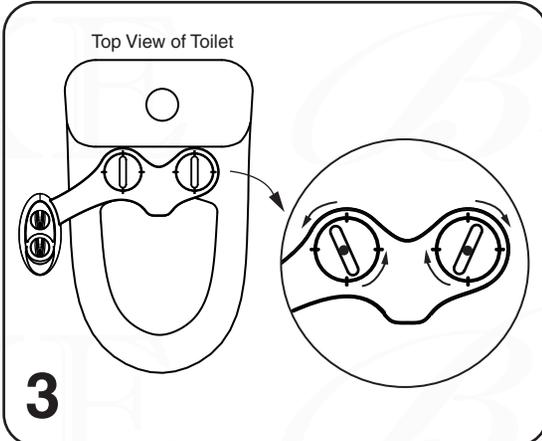

The top of the t-adapter connects with the water tank.

**Tip:** Do not use excessive force while tightening the connection. Hand tighten then use a wrench to gently tighten one quarter or half-turn more.

**1** Shut off the toilet water supply. Flush toilet to empty the tank.

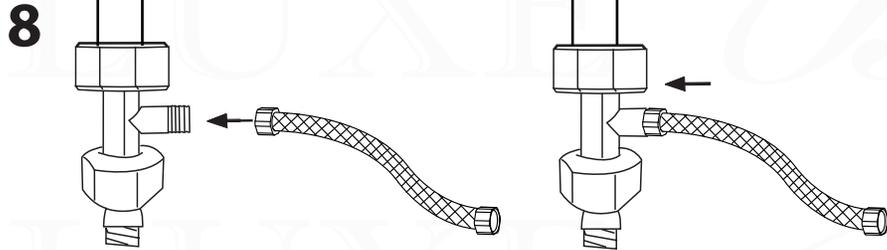

**2** Remove the seat by unscrewing the seat.

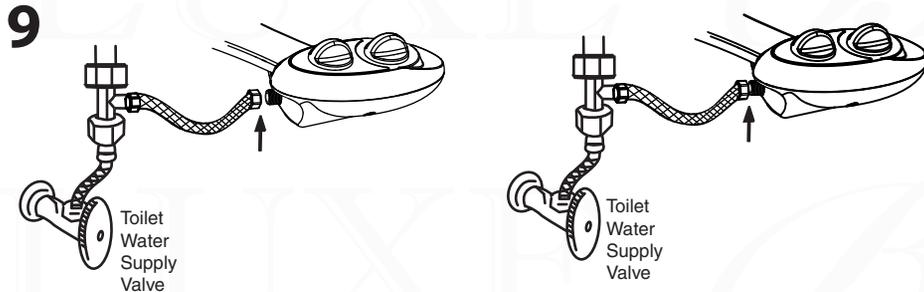

**3** Place the bidet on the toilet. Plates may be adjusted depending on where the two holes in the back of the toilet are.

Connect the metal braided hose to the t-adaptor.

Connect the metal braided hose to the bidet inlet

## ASSEMBLED UNIT

### TRYING YOUR BIDET FOR THE FIRST TIME

Congratulations! You are ready to use the LuxeBidet for the first time. Gently turn the water pressure control knob to reach your desired spray pressure. The control only regulates water pressure, not the duration of the spray.

The working pressure of this product is 50±20 psi

## TROUBLESHOOTING

For additional troubleshooting tips, please see our FAQs page at [www.LuxeBidet.com](http://www.LuxeBidet.com).

**After installing the bidet, the toilet seat sits at an angle and no longer rests on the toilet bowl.**  
Apply adhesive rubber bumpers to the bottom of the seat to eliminate the gap. Bumpers are available for purchase when you go to [www.LuxeBidet.com/accessories](http://www.LuxeBidet.com/accessories).

**When the bidet is on, no water comes out of the spray nozzle.**

Solution 1: Gently pump the nozzle up and down by hand. It may simply be stuck.  
Solution 2: Check that the t-adaptor has been drilled all the way through so water can flow through it. If the t-adaptor is blocked, please contact us for a replacement.

**Water is leaking from a connection**

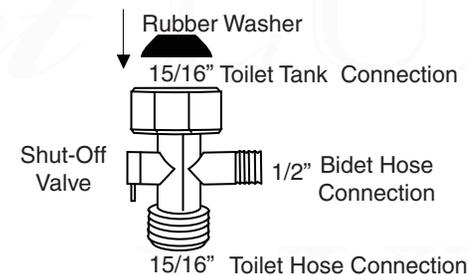

Solution 1: Try reconnecting the t-adaptor to ensure that all threads are catching properly and that the connection is properly tightened.  
Solution 2: If you have difficulty properly tightening the t-adaptor to your toilet tank connection, try wrapping a thin layer of plumbing tape over the toilet tank threads before connecting the t-adaptor. The plumbing tape will allow for added grip.  
Solution 3: If you continue to experience a drip from the t-adaptor or any other connection, please contact us.

**For other questions or concerns, please contact us at  
[www.LuxeBidet.com](http://www.LuxeBidet.com)**

## OPTIONAL ACCESSORY

Available for Purchase at [www.LuxeBidet.com/accessories](http://www.LuxeBidet.com/accessories)

### Metal T-Adapter with Shut-Off Valve (Cold Water)

This metal t-adaptor has a shut-off valve to limit or cut off cold water to the bidet. It can be used instead of the plastic t-adaptor for the cold water connection.
